

CROP CARE SEED TECHNOLOGIES INTRODUCE

SeedCell™

CROP CARE SEED TECHNOLOGIES

Crop Care Seed Technologies is proud to announce a recently formed alliance with prominent and progressive seed sheds in Eastern Australia to create SeedCell.

The SeedCell alliance will ensure, high quality seed, of Crop Care Seed Technologies wheat varieties will be available in the volumes required for Eastern States wheat growers on a regional basis.

SeedCell members are now responsible for the production, processing and sales of the following Crop Care Seed Technologies wheat varieties for 2009:

SeedCell members now have good seed production areas in the ground for seed availability in 2009.

All seed of Crop Care Seed Technologies varieties grown, processed and sold through SeedCell members, will be required to pass high, minimum QA standards, including paddock inspections, and minimum purity and germination standards.

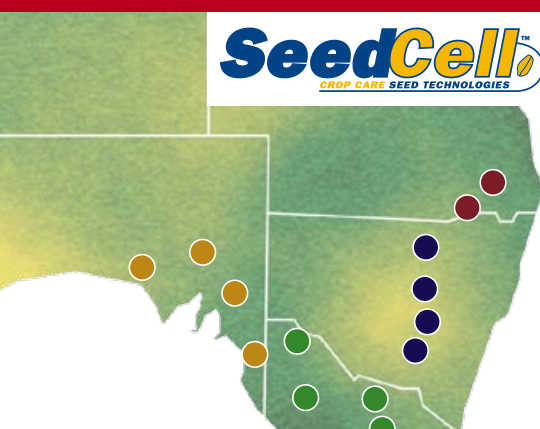

2009 Enquiries and Orders for these wheat varieties can be placed through your local seed supplier.

End Point Royalties apply to all of the above varieties. Further information can be found at:
